

DevOps Engineer

Join the brand that is transforming rural areas with ultrafast full fibre broadband. We're the team where talented people are encouraged to thrive and enhance their career.

Powered by brilliant people with bright ideas, we want to hear yours. Our success is driven by your creativity, collaboration and commitment.

You'll be responsible for all design elements of the Gigaclear fibre network in their own regional area.

You will work closely with other Technology Teams, owning the deployment, operation and support of our on-premise and cloud-based production systems, ensuring the availability, performance, scalability and security of the environments. As well as automation of the company's operations and processes and support and maintenance of all the applications developed in the company.

This role is a technical role with high degree of business user interaction. You will need to be able to communicate with and engage with users of varying levels of technical proficiency. We will support you in fulfilling your potential and you will benefit from training and development from our experienced and expert engineers.

You are ambitious with the tenacity to succeed. You will be able to demonstrate the essential criteria whilst bringing your own passion and ideas. We are happy to consider applications from those seeking a change of career but who can demonstrate the skills below. Some of the key skills you will possess are:

- Ability to develop and reuse solutions using Python and/or C#
- Proficient with SQL and Elasticsearch
- Ability to use Puppet, Ansible, Git and other DevOps tools
- Experience with Kubernetes, Docker and Terraform
- Experience with AWS
- Security focused, problem solver and driven to automate
- Passionate about building and maintaining complex systems
- Continuous improvement of processes and practices
- Ability to collaborate and communicate with others
- Configuring/Managing/Installing Linux is desirable
- Use of monitoring tools such as Icinga is desirable
- Knowledge and experience with TDD & BDD approaches is desirable
- Experience with GIS is desirable
- Experience with BPM is desirable

You share our values. They make us who we are:

- **Find a way:** Always working together to deliver market-leading solutions and provide customer service excellence to our communities
- **Be committed:** We are all accountable for our actions and work relentlessly with our many customers to deliver on our promises
- **Do the right thing:** We always base our decisions on what we believe is fair, considerate and in the best interest of our customers and our colleagues
- **Keep it simple:** In an industry of complexity and confusion, we make things easy for everyone to understand

Culture & benefits:

We empower people to do what they do best; fast. We want you to bring you, so we don't 'fence' anyone in to a single way of working. You will get the latest news through our staff magazine, Gigabites, and monthly company updates (food can play a major part in this!). You are living and breathing our values, so your colleagues may nominate you for our Star of the Month award. If you win you get an extra day's holiday. Like us, you probably like to get a bit social too. We have a weekly running club, Gigaclear FC plus two company socials a year, and more.

On top of this we offer great benefits such as, uncapped commission, car allowance, flexible working conditions, study support, Income Protection, Life Assurance, a generous contributory pension scheme and 25 days holiday (plus bank holidays) with the option to purchase additional holidays.

When you apply for this role, please access the full job description in the account registration area.
